

# Distilleries Product Guide

Protecting People, Property and our Planet.

# The safety experts

Elmac Technologies offers a comprehensive range of safety products to the world's spirit producers, ensuring the highest levels of protection and regulatory compliance in their hazardous production and storage environments.

Distilleries are under increasing regulatory pressure to install adequate operational and emergency venting, as well as explosion protection

devices for use in potentially combustible atmospheres that may be subject to BLEVE (engulfment by fire) incidents.

In this highly competitive market, our customers seek solutions that provide higher returns on investment through greater yields and lower operating costs.

## End-of-line EHB

Specification and sizing available for a **wide range of industry standards**, including API 2000, NFPA 30 & SWA.

### Explosion Protection recommendations

In-line LCB

In-line UCB

End-of-line EHB
