

# Fuel Distribution Product Guide

Protecting People, Property and our Planet.

Protecting People, Property and our Planet.

# The safety experts

Elmac Technologies has designed an innovative range of products to reduce both the risks and costs associated with the protection of people, equipment, and the environment in these uniquely hazardous working conditions.

The possibility of VOC ignition leading to a potentially catastrophic explosion is an ever-present risk in the fuel distribution industry.

When working in the extremely hazardous environments encountered in vapour recovery and associated operations, simple but effective explosion protection devices are a must.

Operational needs necessitate complete dependability, minimal maintenance, and, of course, cost-effective solutions.

## In-line UCA

### Explosion Protection recommendations

In-Line  
UCA

End-of-line  
EVA

In-Line  
LEA

Pressure/Vacuum  
Relief Valves

Emergency Relief  
Vents

Tank Blanketing  
Valves
